

## **PUBLIC REACTION OF OBSERVATORY AT NATIONAL LEVEL**

Observatory for Children's Rights through representatives in 12 regions of the country with a focus on monitoring, implementation and observance of the children rights **react publicly about the violence caused on the children of Orphanage in Shkodra (Preschool 3-6 years).**

Painful, unforgivable and scandalous is violent and degrading behavior of a irresponsible caregivers team, against unfortunate children with their lives. In institution that provides and educates orphaned minors in their fate, - was given pain, tears and sadness instead of love, joy and happiness childish.

The right to a life with dignity and without violence is legitimate and guaranteed by a series of national and international instruments. Guarantee institutions, instead of a legal obligation for protective services, offer violence and aggression, undermining values of innocent human beings - children.

**Observatory for Children's Rights** being sensitive to issues related to guaranteeing and realizing the rights of children, express indignation and maximal concern for the occurrence of this event.

Legislative institutions in the country, should and are expected to be more sensitive to violence and react on time efficiently and effectively with appropriate punitive measures. Protecting every child is human and legal obligation for any individual, and we all should be vigilant and punitive against these degrading and outrageous acts.

Curing the dignity of minors already damaged will take a lot of energy and commitment, by how much would take prevention of these human cruelties that have occurred.
